Mission

At The CrunchCup we're all about **reinventing breakfast** and making a difference! We blend innovation, convenience, and sustainability to create the ultimate cereal companion for on-the-go lifestyles.

But, our mission doesn't end there. Our hearts are deeply committed to eradicating world hunger, and that's why we pour 5% of our annual profits into this life-changing cause. Together, let's **crunch** hunger away and make every morning **amazing!**

Values

Innovation

We're **constantly** pushing boundaries to make breakfast experiences **extraordinary** for our on-the-go cereal lovers!

Sustainability

We care about our planet! Our products **champion** eco-friendliness, minimizing waste, and promoting responsible choices.

Compassion

Our hearts beat for **positive impact**. We donate 5% of annual profits to fight global hunger, making a **real difference** together.

Logo

Logo

Primary logo
Our primary logo features the CrunchCup wordmark in yellow and black with our trademark bite. The primary logo should be used whenever possible.

Clear space
The clear space for the primary logo is defined by its **X-height**. This clear space must be adhered to at all times to ensure enough breathing space.

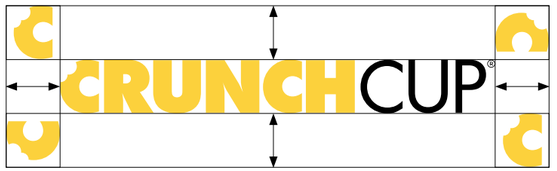

Minimum size
To ensure legibility, please adhere to the minimum logo size recommendation for both digital and print.

Do not stretch, distort or rotate the logo in any way.

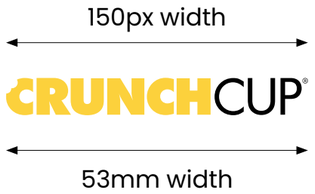

Primary logo

CRUNCHCUP®

Logo

Secondary logos
Our secondary logos consist of three variations; black, black and white and white. These variations are only to be used when use of the primary logo is not possible.

Please ensure the same clear space and minimum size rules are applied to these variations as is seen with the primary logo.

Black

Black & white

White

Logo

Icon
Our logo icon is a singular mark of our identity. It is available in three variations; yellow, black and white. The logo icon can be used when use of the primary logo is not possible, or when deemed appropriate.

Clear space
The clear space for the logo icon is defined by **half of its own height**. This clear space must be adhered to at all times to ensure enough breathing space.

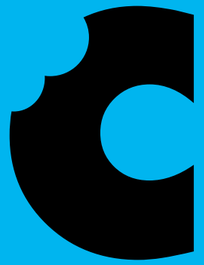

Minimum size
To ensure legibility, please adhere to the minimum logo size recommendation for both digital and print.

Do not stretch, distort or rotate the logo in any way.

10mm width

Colour

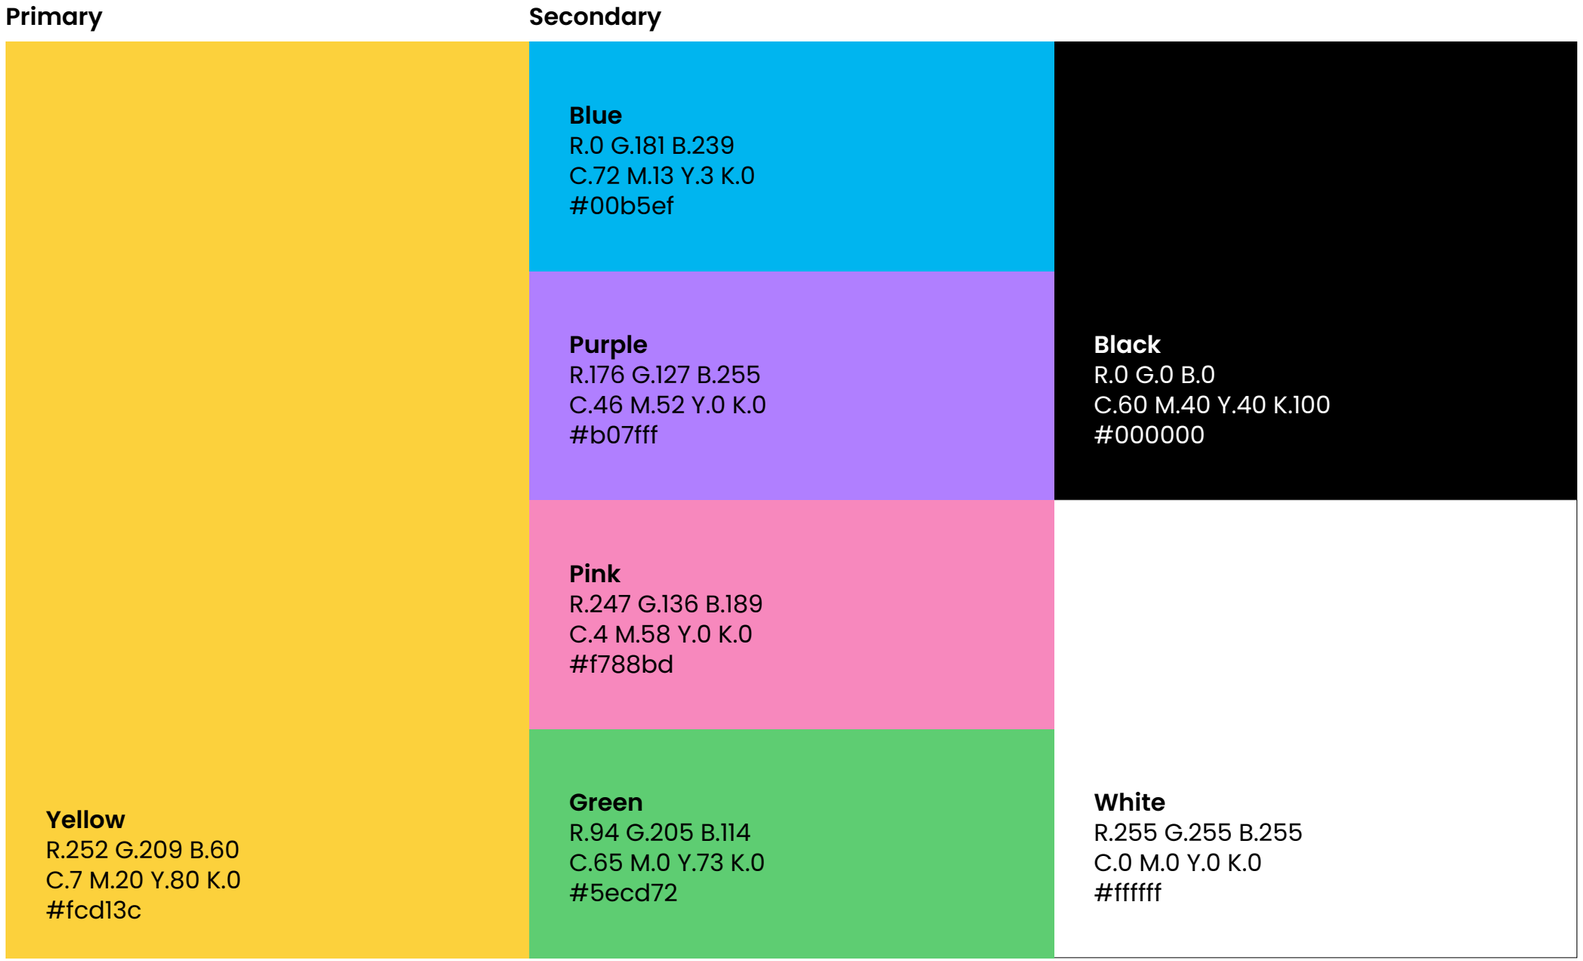

Colour

We have primary and secondary palettes available for use across all communications. For consistency, specific values have been defined for both print and digital production.

Primary palette
Yellow is the unifying colour that is to feature on all CrunchCup communications in some form. It can be used as a dominant background colour (solid or gradient), accent colour within typography, highlight or shape.

Secondary palette
Blue, purple, pink and green make up our secondary palette. All colours can be used as the dominant background colour (solid or gradient), or used as an accent colour within typography, highlights or shapes. Black is the dominant colour used for all typography, with white being used when deemed appropriate.

Be aware that CMYK outputs of the palettes will differ to the RGB versions seen on screen. It is advisable to obtain proofs before committing to print. Some value adjustments may be necessary.

Colour

Gradients
Four gradient options are available for use in backgrounds across digital and print communications, helping to bring contrast and depth to the vibrant colour palette. See key visuals section for examples.

Note both the colour combinations and location settings outlined on the right. Gradients must always be set as linear and can be applied at any angle.

Be aware that gradients do not always produce good results in print. CMYK outputs of the gradients will differ to the RGB versions seen on screen. It is advisable to obtain proofs before committing to print. Some value adjustments may be necessary.

Typography

Typography

Primary typeface
Our primary typeface is Gilroy Black. It is the voice of our brand and works best for headings and larger call-outs across all communications. In order to maintain brand integrity we ask that only Gilroy Black be used, avoiding the use of lighter weights.

Secondary typeface
Our secondary typeface is Poppins and is to be used across all communications. Poppins is available in a variety of weights, however, we recommend the use of contrasting weights in order to achieve a clear hierarchy. Please see hierarchy examples on p14.

For instances where Gilroy and/or Poppins is not available (such as internal PowerPoint presentations) use the system font Arial.

Gilroy Black

abcdefghijklmnopqrstuvwxyz
ABCDEFGHIJKLMNOPQRSTUVWXYZ

Poppins SemiBold

abcdefghijklmnopqrstuvwxyz
ABCDEFGHIJKLMNOPQRSTUVWXYZ

Poppins Regular

abcdefghijklmnopqrstuvwxyz
ABCDEFGHIJKLMNOPQRSTUVWXYZ

Typography

Hierarchy
In order to achieve typographical consistency within the brand it is important to apply each font in the correct place and in a contrasting weight and size.

The example opposite illustrates a typical hierarchy that can be used. Please note the size difference between each level and the corresponding font weight.

Heading
Font: Gilroy Black
Size: 60pt / 64 leading
Kerning: Optical
Tracking: 0

Sub heading / Call-out
Font: Poppins SemiBold
Size: 26pt / 32 leading
Kerning: Optical
Tracking: 0

Body copy
Font: Poppins Regular
Size: 14pt / 20 leading
Kerning: Optical
Tracking: 0

It’s cereal on the go!

Ditch the spoon & bowl & take your cereal for a stroll.

Whether you’re sitting on the couch, at your desk or on the move, you can enjoy your cereal anywhere with this dual-chambered, reusable, dishwasher safe tumbler made of durable, BPA-free Tritan.

Typography

Highlights
These provide an effective way to help emphasise a particular word in a heading and can be used for both digital and print applications.

The examples on the right illustrate how highlights can work within headings. The construction of the highlight has no rule itself, but ensure you closely follow the examples seen on this page and within the key visuals. The rotation angle should always be set at either 1.5° or -1.5° and both primary and secondary colours can be used as the highlight colour.

When applying, ensure there is sufficient contrast between the highlight colour and the background.

No spoon. No bowl.
It's cereal on the go!

Colour: Yellow
Rotation angle: 1.5°

Make breakfast easier
for the whole family.

Colour: Blue
Rotation angle: -1.5°

Rotation angle: 1.5°

Assets

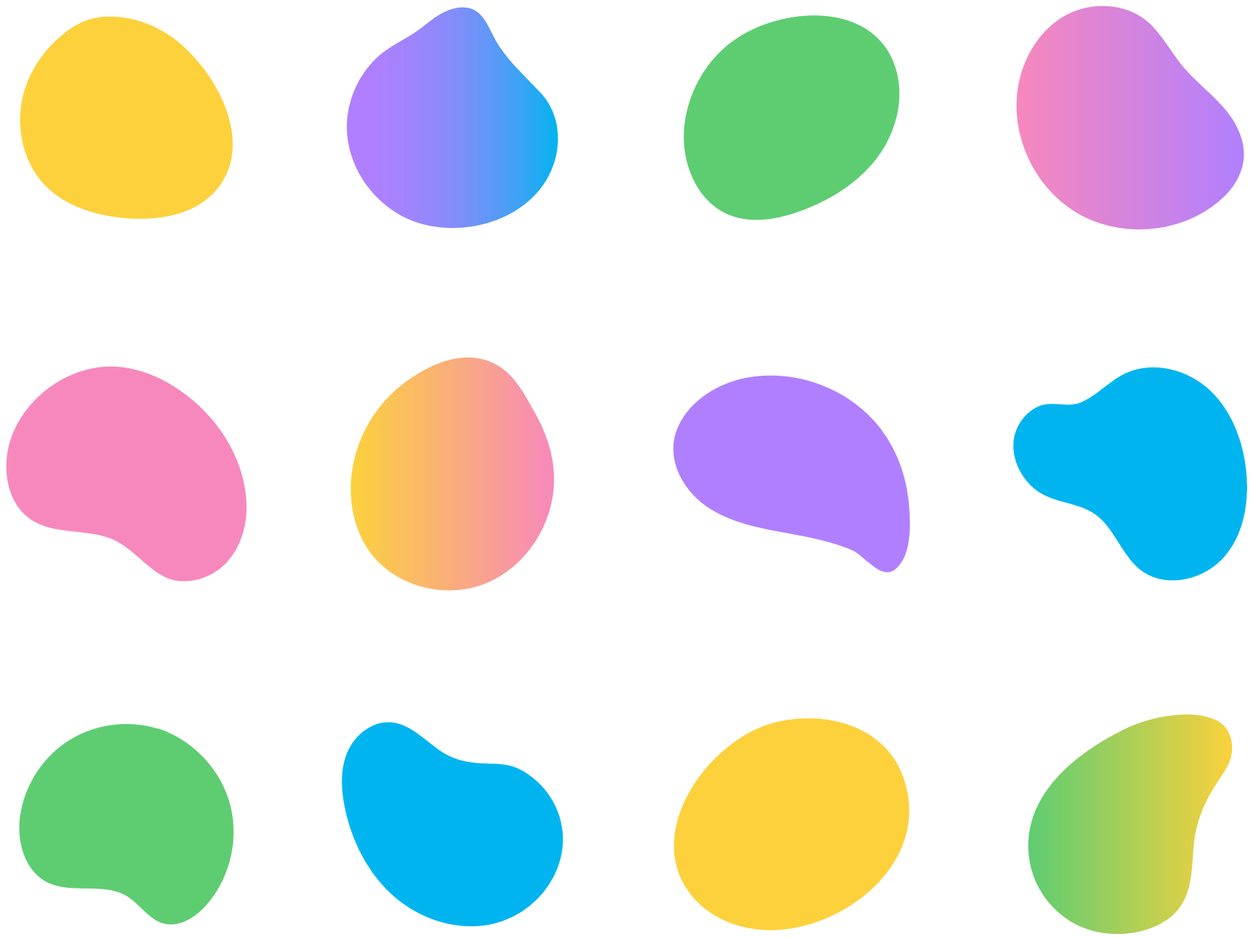

Shapes

Our liquid shapes echo the flexibility and fluidity of our brand. When layered correctly they can help provide depth and intrigue to both text and image areas.

The examples on the right shows how any primary and secondary solid colour or gradient option can be applied to a shape. As well as the 12 examples opposite being available, it is possible to create custom shapes that fit better around the intended application. When doing so, ensure the shape takes on a liquid/fluid nature that reflects the ones seen on this page.

Shapes can be rotated to better suit the application but it is not recommended to stretch or distort the shape in any way. Custom shapes should be created when needed.

See the key visuals section for examples of shape application.

Icons

Our icons are not just a playful way for us to convey our messaging, they are also a way for us to stay grounded, making sure we don't fall into that 'stuffy' trap and generally keep happy and positive.

Icons can be used across all communications and should be used only in black in order to achieve maximum contrast and to complement the typography.

Use icons sparingly within each design piece and ensure relevancy to the messaging.

Diagrams

Our diagrams and technical drawings are a way to help illustrate a process. The example on the right shows a four step process for how to assemble, fill and use the CrunchCup.

When creating diagrams and technical drawings ensure they are set in black, and that the weight of the stroke closely matches the example opposite – not too thin and not too thick. Movement, such as pouring, twisting etc. should be highlighted in a primary or secondary colour.

Diagrams and technical drawings should be clear and simple in their construction, clearly labelled and accompanied by step annotations if required.

Key visuals

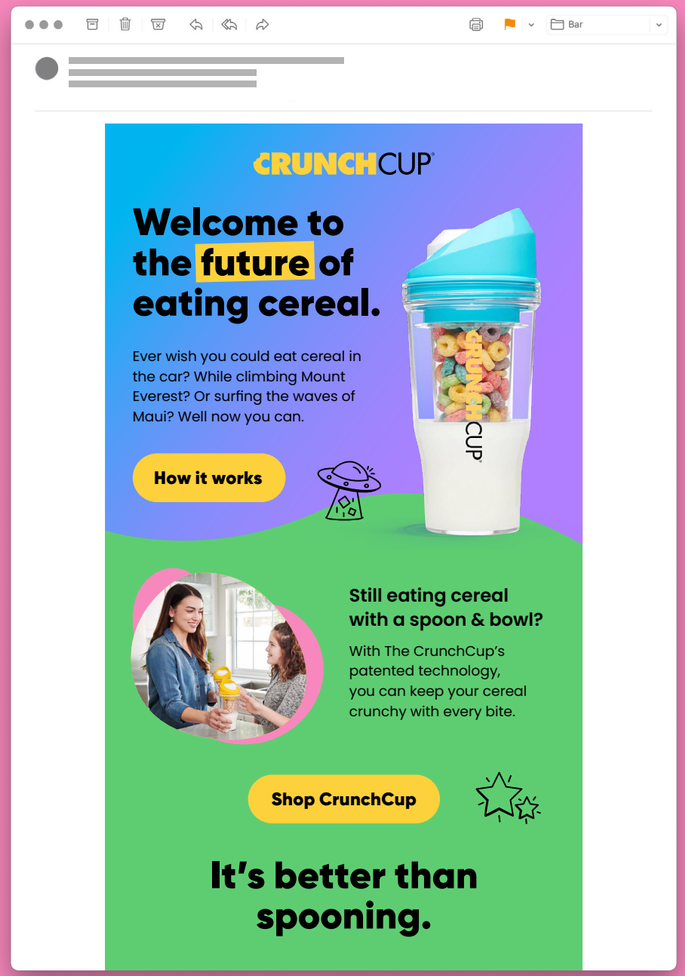

Emails

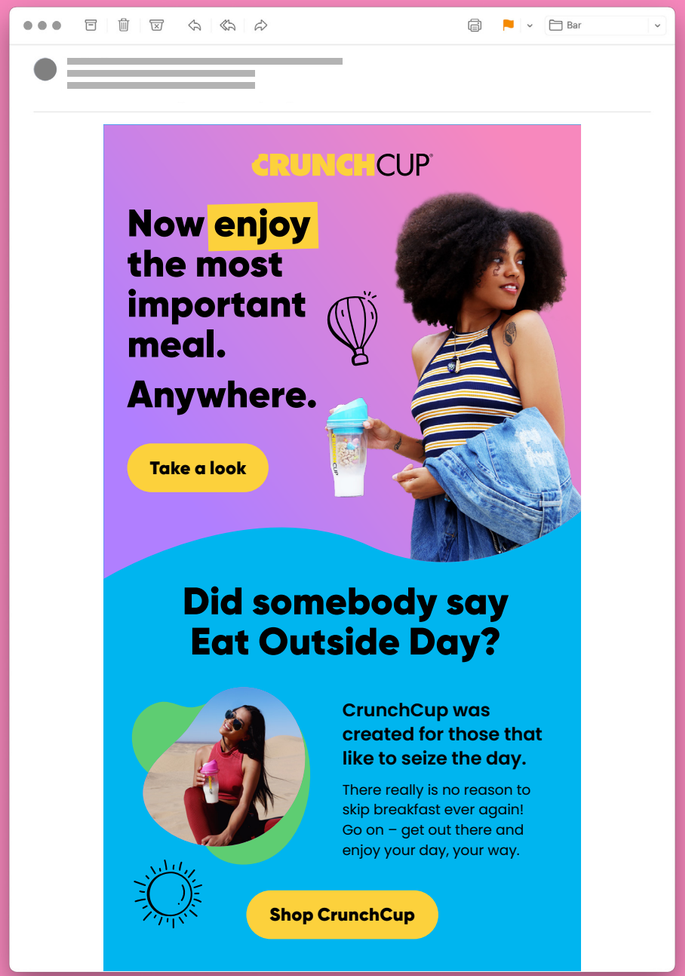

Email designs are a great way to bring all brand elements together, working hard to communicate our values and tone of voice in a friendly fashion.

The examples opposite show consistency in title, sub heading and body copy, as well as eye catching variations of image, icon and shape use.

Fluid section dividers (seen opposite) can be used to help generate movement, though hard edge lines can also be used.

Button styles should be consistent throughout all digital applications, featuring rounded edges and equal spacing either side.

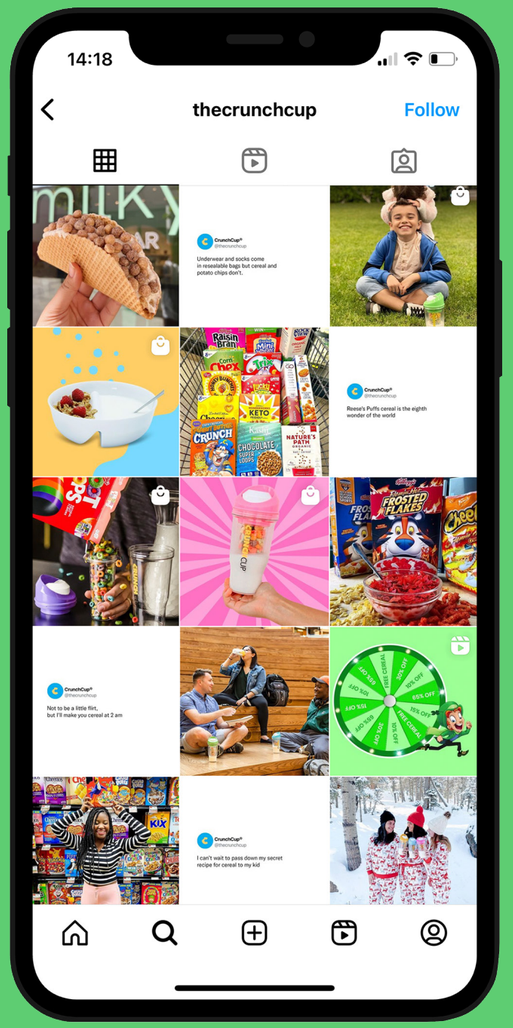

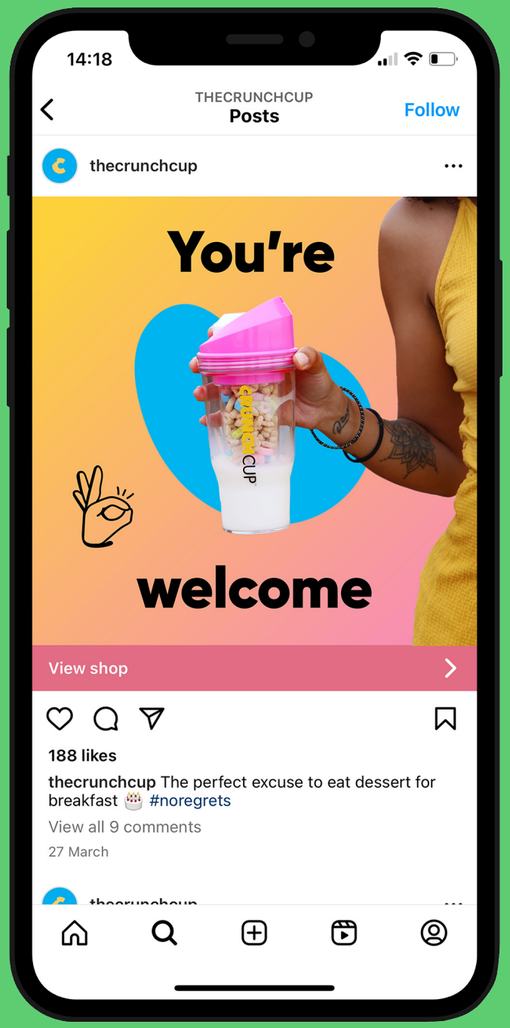

Social

We like to keep our social creative impactful and relevant to the messaging. In order to achieve long term engagement we realise the importance of change as well as consistency, which is why we allow for more creative licence when posting, but do encourage the following:

- Post designs should incorporate all the image and typographic rules of the brand
- Ensure designs differ visually enough to achieve fresher looking content more regularly
- Keep post creative bold and uncomplicated
- Specifically for Instagram, ensure the brand post pattern is repeated as seen in the grid; graphic, image, text, image

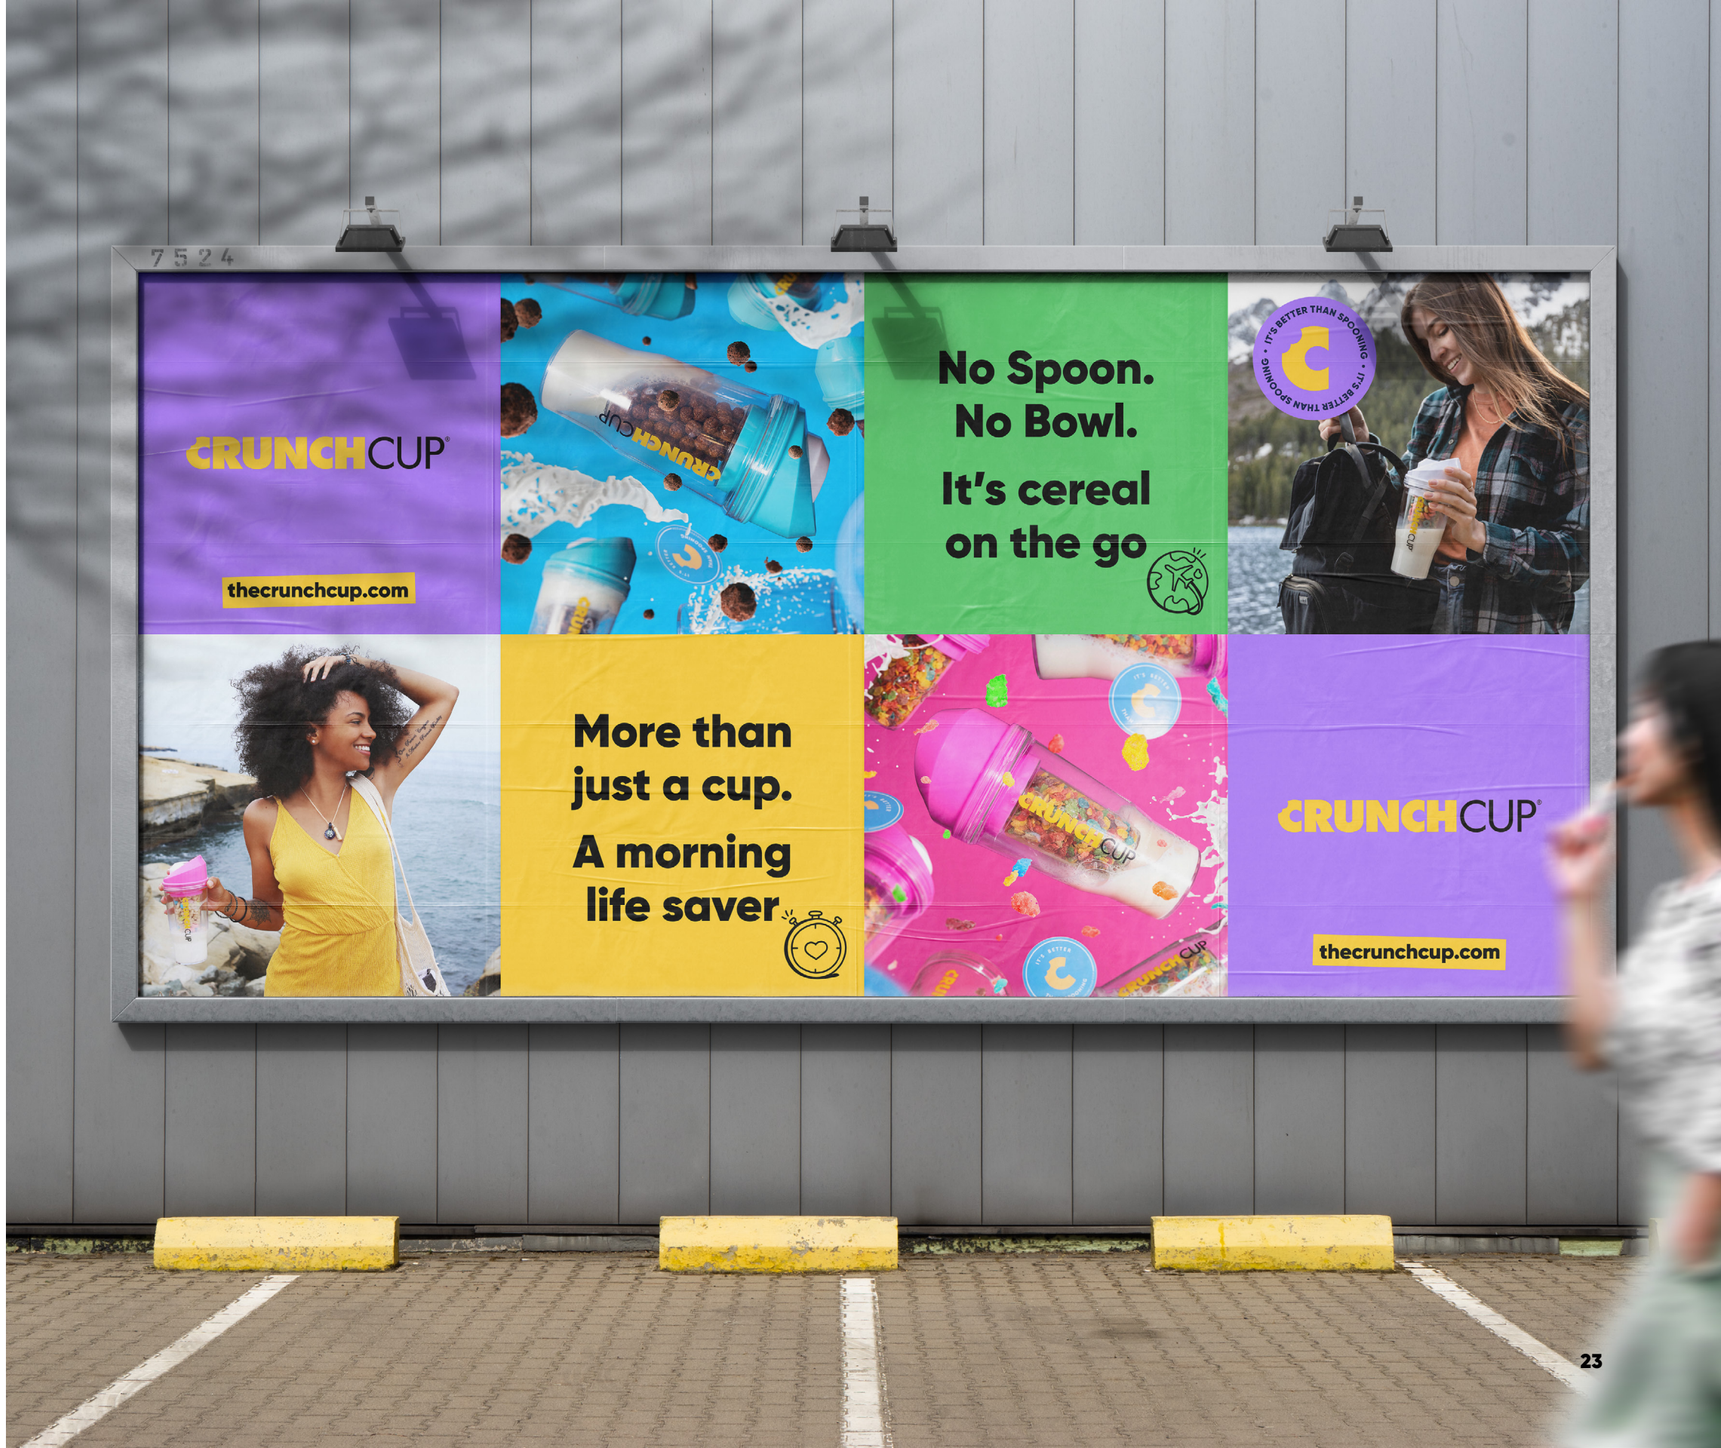

Print

Print pieces should reflect all the brand values and tone of voice that digital communications do. Ensure plenty of contrast in order to achieve maximum impact, making more use of solid colours mixed with bold imagery.

Be aware that CMYK outputs of the palettes (solid and gradient) will differ to the RGB versions seen on screen. It is advisable to obtain proofs before committing to print. Some value adjustments may be necessary.
